e-con Systems Announces Its Windows Embedded CE Expertise With a Microsoft Most Valuable Professional Award

St. Louis, USA/Chennai, India – July 28, 2010

Today, e-con Systems, a Microsoft Windows Embedded partner based out of India, announced a new Microsoft Most Valuable Professional (MVP) award for Vinoth Rajagopalan, Windows Embedded Technical Lead at e-con Systems.

The Microsoft MVP Award recognizes exceptional technical community leaders from around the world who voluntarily share their deep, real-world knowledge about Microsoft technologies with others. Award recipients for their technical expertise with Windows Embedded or other Microsoft technologies are nominated by the technical community members, current and former MVPs, and Microsoft personnel who have noted their leadership and their willingness and ability to help others make the most of their Microsoft technology. The Microsoft Windows Embedded MVP program is comprised of MVPs worldwide dedicated to Windows Embedded activities.

To receive MVP Award status, individuals are nominated by technical community members, current MVPs, and Microsoft personnel. A panel that includes MVP team members and product group teams evaluates each nominee's technical expertise and voluntary community contributions in the past year and considers the quality, quantity, and level of impact of the MVP nominee's contributions. Active MVPs receive the same level of scrutiny as other candidates each year.

Vinoth Rajagopalan received this prestigious recognition for his outstanding expertise in Windows Embedded CE. Vinoth is one of e-con Systems's Embedded Senior Lead helping OEMs with the System Integration of Windows Embedded CE on custom designs. He is involved in various BSP adaptations, customizations and optimizations to help OEMs secure Windows Embedded CE based designs, while maintaining a quick time to market. He has published many technical articles and blog posts on Windows Embedded CE on behalf of e-con Systems. He has also participated in MSDN newsgroups and forums related to Windows Embedded.

"We are pleased to award Vinoth Rajagopalan the title of Microsoft MVP in recognition of his continued contributions to the embedded community and technical expertise with the Windows Embedded family of products, specifically Windows Embedded CE," said John Boladian, Marketing Director, Windows Embedded, Asia Pacific & Greater China, Microsoft Corp. "As a Windows Embedded partner in India, e-con Systems demonstrates its ongoing dedication to help OEMs quickly deliver specialized devices that stand out through rich user experiences and seamless connections to the world of Windows."

About e-con Systems:

e-con Systems a Windows Embedded Gold Partner is an embedded product development services company focused on end-end product development. e-con Systems has expertise in mobile processors such as PXA270, PXA300, PXA320, AU1250 and has been using its product engineering services to help customers on development of products such as digital picture frames, point of sale terminals, handheld single board computers etc.

Besides this, e-con provides systems integration services such as Windows Embedded CE or Linux BSP porting solutions and device driver development. Also e-con's design services have been used by customers across the globe for hardware design of their products. Visit www.e-consystems.com
